

Hose Reel Ratchet Arm Replacement – Part # HRPART1

Tools Needed:

- 17mm Wrench or Socket
- 5/8" Wrench or Adjustable Wrench
- Needle Nose Pliers

Step 1

Remove 17mm nut from outside of Reel housing, may have to secure the 5/8" Pin inside with wrench.

Step 2

Reach behind arm and pull the Ratchet Arm assembly where you can access it to disassemble.

Hose Reel Ratchet Arm Replacement – Part # HRPART1

Step 3

Remove Steel washer, Black Spacer, and Black Pin from the Arm.

Step 4

With needle nose pliers, remove arm from spring leaving spring attached to the reel base..

Hose Reel Ratchet Arm Replacement – Part # HRPART1

Step 5

Replace Arm with new Arm (and spring if needed) and reassemble, in the order of pin, arm, spacer, washer as shown.

Step 6

Feed Assembly back into the reel and re-attach nut and tighten.
